TECHNICAL DATA SHEET

Zn EDTA 9% Liquid

Commodity: *Zinc EDTA 9% Liquid*

TYPICAL ANALYSIS

Zinc (Zn)9.0%
9.0% Chelated Zinc Derived from Ethylenediaminetetraacetic Acid and Zinc Oxide

Contains: Total Zinc as Chelated elemental Zinc 1 pound per gallon

(Net weight per gallon is 10.8 pounds; May form crystals at temperature < 25 F)

Zn EDTA 9% is a Fully Chelated Micronutrient recommended especially for:

- Mixing with liquid fertilizers for pre-emergent or post-emergent applications.
- Mixing with liquid fertilizers for foliar applications.
- Application in irrigation water, either alone or in combination with fertilizers and/or pesticides.
- Mixing with pesticide spray solutions for soil or foliar applications.
- Applications either alone or as a component on other liquid mixtures where soil application is otherwise impractical.

The prevention of micronutrient deficiencies in crops is preferable to correcting them after symptoms appear, although this can often be done by prompt soil and/or foliar application. Foliar applications are recommended when fast correction is necessary or soil application is expensive and not practical.
